Methodology

- ▲ New Zealand results in this report are based upon questions asked in the Talbot Mills Research online nation-wide daily tracking survey between the 14th November to the 12th December 2023.
- ▲ The results are based on a nationally representative sample of 1034 Aucklanders 18 years of age and over.
- ▲ The maximum margin of error for a sample size of 601 for a 50% figure at the 95% confidence level is $\pm 4.0\%$.

Note on rounding:

- ▲ All numbers are shown rounded to zero decimal places. Hence specified totals are not always exactly equal to the sum of the specified sub-totals. The differences are seldom more than 1%.
- ▲ For example: $2.7 + 3.5 = 6.2$ would appear: $3 + 4 = 6$.
